1

Whats your department in UCL and the course you are studying?

CASA

2

Please select 3 sessions which you found most helpful or relevant for your research.

Bash or Unix Shell

R Statistical Programming

Databases

3

What do you think that worked very well in these series of talks?

I really like the clear logic going from where it is from, why people use that, and how it is relevant to your project. And of course the amazing demo, demonstrating how it can be used in our researches.

4

What do you think were the problems faced in these series of talks?

I think it's great so far. As for other potential topics, would it possible to elaborate more on interactive mapping?
